

A high-angle photograph of a lettuce field. The plants are arranged in neat rows, and a silver drip tape is visible running between the rows in the soil. The soil is dark brown and appears to be well-tended. The lettuce leaves are vibrant green and have a ruffled texture.

**LONGER REELS (UP TO 20% MORE)
 MORE METERS PER PALLET
 MORE METERS PER SHIPMENT**

Ag

BENEFITS FOR FARMERS

LESS CHANGEOVERS

Longer reels reduce the number of changeovers during the installation (down to 20% less changeovers!).

FEWER COUPLINGS

Less changeovers means lower use of couplings (down to 20% less couplings!) with a consequent reduction in system overall costs.

QUICKER INSTALLATION

The easier and quicker installation allows to work larger surfaces (in the same timeframe) with significant savings in terms of time, labor and machinery's utilization.

Ag

BENEFITS FOR DISTRIBUTORS

MINIMUM SPACE

The new packaging optimizes warehouse spaces allowing to stock more drip tape in the same volume (up to 25% more meters). The cleared space could be used for providing an even better service to the whole distribution chain.

OPTIMIZED SHIPMENTS

The new packaging is designed to optimize loads and reduce the impact of shipping costs (down to 20% less).

REDUCED HANDLING

Optimized packaging means reduced handling operations with consequent labor saving and better forklift utilization. (down to 45% less operations).
