

DOSATRON D20

APPLICATIONS

- Fertigation, treatments with plant protection products, PH correction, flocculant dosage.

FEATURES

The Dosatron technology is based on a pump with hydraulic motor, activated solely through the water pressure and flow.

- Non-electric, it works with water pressure
- It ensures a precise, homogeneous and continuous dosage
- It improves yields and limits wash-out phenomena
- Savings in water, product and labour

SPECIFICATIONS

- Operating water flow rate*: 1000 - 20000 l/h
- Adjustable dosage: 0.2 - 2% [1:500-1:50]
- Injection rate of the concentrated product: 2 - 400 l/h
- Working pressure: 0.12 - 10 bar
- Operating water temperature: 5°C - 40°C
- Pressure drop: 0.12-0.88 bar (depending on the operating conditions)
- 2" male thread

* For other motor fluids, consult our technical office

Codification

Code	Description
D20GL2VF	2" D20 with flow rate 1000-20000 l / h, dosage 0.2-2%
