

# Ag

## THE DRIP'S ADVANTAGES: SAVINGS

### WATER SAVING

Uniform distribution of water and reduction of water waste

### ENERGY

The system works at low pressure and with the minimum use of energy

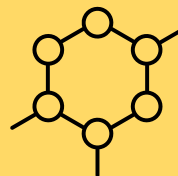

### LABOUR

Ease of management of the installation and reduction of labour costs.

### NUTRIENTS

Reduction in the use of nutrients thanks to the high distribution uniformity

### EFFICIENCY

Optimal use of all company resources

### RISKS

Your harvest is ensured even in the event of dry weather
